

Engineering systems and constructions. Design, installation

QUALITY, COMFORT, SAFETY

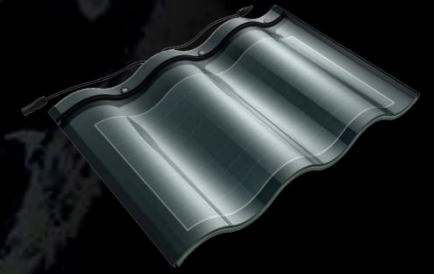

I'd like to ask for your attention for a few minutes:

Here you can find something that might interest you or your friends and partners. We have 4 areas of work.

Whether you are a manager in the construction or any other industry, or you are a private individual, or you are an engineer, or you have no engineering skills, you constantly use some kind of engineering products. And you are looking for a qualified specialist contractor who will perform the necessary work in a quality manner in accordance with his qualifications.

Please check out our areas of work, order from us, or recommend us to your other friends and partners.

Sincerely, the Head of LLC "ALTEN-TECHNO"

OUR PROPOSAL

◆ ALTEN-TECHNO's energy saving technologies division.

The company is engaged in the design and installation of solar power plants. The emphasis is on solar tiles. In addition, we offer a comprehensive solution that includes not only the power plant itself but also related engineering systems. Which are worth paying attention to. We started working in this area in 1998. As early as 2000, one of our companies received an honorary award from the State Committee for Energy Saving of Ukraine.

OUR PROPOSAL

◆ ALTEN-TECHNO's division for engineering networks and systems.

The company installs automation systems. We specialize in “Smart Houses”, not only for homes but also for offices, residential complexes, and other facilities. In addition to smart automation, we also install other automation, such as automatic doors, automation for windows, automation for gates, and so on. We started working with automation in 2014. The installation of automatic doors can be distinguished as a separate area, as they can be either conventional sliding or swing doors, as well as carousel doors and entrance groups with engineering structures. This trend dates from 2005.

OUR PROPOSAL

◆ ALTEN-TECHNO's engineering structures division.

The company mainly performs installation of: fences; glass structures; entrance units, including automatic doors, etc. We also offer architectural and engineering design and carry out design projects.

Recently, a new line of business was opened - plastic products and molds making for molding.

OUR PROPOSAL

◆ ALTEN-TECHNO's division for innovative technologies.

In general, the introduction of new products and technologies into production has been one of the Company's priorities since the beginning of the merger and creation of ALTEN-TECHNO.

We mean innovative technologies in the **technical** field.

We are also constantly looking for and supporting innovative ideas in the areas of electrical engineering, energy, robotics, telecommunications and other technical fields. We offer cooperation.

What you get:

- **Technical product**

After completing all the work, you will receive a modern, fully functional, operating technical system that is easy to use.

- **Fair price**

The cost of equipment and works corresponds to the market value. Prices are competitive.

- **Technical support**

It is very important for us to support our customers during the warranty and post-warranty periods. And also to carry out maintenance, if necessary, according to the regulations.

The main stages of solving your task:

- Preliminary cost estimate
- Setting terms and conditions of work performance
- Calculation of the commercial offer
- Conclusion of the agreement
- Installation works
- Putting the engineering system into operation
- Warranty and maintenance service

The stages of work can be adjusted depending on the types of engineering systems, constructions, their purpose, simplified and performed simultaneously

EXPECTED RESULTS

We look forward to a long and mutually beneficial cooperation, satisfaction of your needs and your recommendations to other potential customers of our products and services.

Our goal: To find the best engineering solution for the Customer in terms of cost, reliability and efficiency.

The ALTEN-TECHNO Company's work style is quality, mobility, prudence in decision-making, and execution of work within the clearly defined time frame.

The technical result of the work of the Energy Saving Technologies Division:

- The power plant that runs on renewable energy sources. The solar power plant. The roof is made of solar tiles. All related structures and engineering protection systems, etc.
- The customer must be aware of the features of this product and the expected result. The main goal we are striving for: energy independence.

Technical result of the work of the Engineering Networks and Systems Division :

- Quality, comfort, safety. Automated home network "Smart House". Automation, dispatching of residential complexes, office centers, and more. Other automation systems.
- The customer receives not only comfort of use, but also a cost-effective automation system.

The technical result of the Engineering Constructions Division:

- The structure was developed and designed by ALTEN-TECHNO. Related structures to engineering systems. If necessary, drawings and other documentation. Visualization of the structure, design, architectural design, engineering design. Ready-made engineering structure at the object.
- The customer receives the complete solution for their needs. Ask us about our capabilities.

Main brands used by ALTEN-TECHNO:

- Solar tiles (roofing photovoltaic solar modules) Hantile – manufacturer **Hanergy** Holding Group Ltd., China.
- Hybrid power inverters **Stromherz**. Austria. Headquarters Nordex Holding / Stromherz Scotland, components from China.
- Solar panels **Risen** Energy Co, Ltd, China. **British Solar** Renewables, United Kingdom.
- Accumulators **MERLION** BATTERY CO, LTD., China. **EverExceed** Industrial Corporation LTD., China.
- Surge protection devices **Saltek** s.r.o (Czechia).
- Automated protection devices **Hager** Group (Germany). **ETIMAT**, ETI Elektroelement d.o.o. (Slovenia). **ABB**, Ltd (headquarters Switzerland).
- Active lightning arresters **SCHIRTEC** AG (Austria). CMB Technology **GALMAR** (Poland).

Main brands used by ALTEN-TECHNO:

- Controllers **Tecomat** by company **TECO a.s.** (Czechia)
- House automatization **Tecomat Foxtrot**, **TECO Advanced Automation**. **Larnitech**, (Germany). **Zipato**, **Tri plus grupa d.o.o** (Croatia).
- Automatic doors **GEZE GmbH** (Germany). **Tormax** (Switzerland). **Ryterna Group** (Lithuania)
- Automatic gate drives **Hörmann**, (Germany). **FAAC Group** (Italy).
- Engineering construction **ОБСТ.ХХХХХХ.ХХХ LLC „ALTEN-TECHNO“** (Ukraine).

As the company develops, it has the opportunity to represent products from other well-known brands.

QUALITY, COMFORT, SAFETY

The professionals at the united company ALTEN-TECHNO have successfully implemented many high-tech projects that require impeccable professionalism and maximum responsibility. As professionals who are guided by modern service standards, we care not only about the quality of our work. We are able to really save our client's time, budget and comfort, while offering the best, scientifically developed, technical solutions.
